Career

2008...today: Tri_B-Werk GmbH

2006...2008: Burkhalter Consulting & Engineering Services

Consulting, concept design, project leading and engineering for hard- and software development.

- * ABB Baden und Turgi (Noser Engineering)
- * Stadler Rail (Noser Engineering)
- * Ruf Telematik (Noser Engineering)
- * BELIMO Automation (Ergon Informatik)

2003...2006: Loepfe Brothers AG

Head of R&D, system development from sensor to database, with approximately 20 engineers.

- * Problem solving on a number of quality issues
- * Definition development strategy
- * Prepare of appropriate base technologies
- * Complement and reorganization of development team
- * Introduction of new development tools
- * Establish of a project organisation and project database
- * Start a short and middle term development planning

2000...2003: Metrix Systems AG (today mx-systems AG)

Head of R&D of a management buyout from the Bernina Electronic AG. Later head of development, production, logistics, finance and human resources (35 heads)

- * Development of SmartCard and wireless technology based heat- and watermetering solutions.
- * Production of heatmeters, watermeters and flowmeters, small production footprint with partially outsourced production in Germany
- * Financing with monthly reporting: Finanzen mit monatlichem Reporting: Financial and operational statement, rolling planning on product basis, automatic synchronization with ERP system Navision
- * Human resources, despite financial critical situation, motivated team with trust in board

1999...2000: Bernina Electronic AG

Head of R&D and member of the board. Development department (20 engineers) with the following main tasks:

- * Sewing machine electronics and firmware Nähmaschinen elektronik und-Firmware
- * Elektr. Heizkostenverteiler, Wärme- und Wasserzähler
- * Development projects for external customers
- * Production-Engineering for internal PCB production
